Exam : **Acquia Certified
Developer D10**

Title : **Acquia Certified Developer -
Drupal 10**

Version : **DEMO**

1.What is the correct HTML element for inserting a line break?

- A. <break>
- B.

- C. <lb>
- D. <line>

Answer: B

Explanation:

The
 tag is used to insert a line break in HTML. It is a self-closing tag. It does not require a closing tag. It's commonly used in places like poems or addresses.

2.Which CSS property controls the text size?

- A. font-size
- B. text-style
- C. font-style
- D. text-size

Answer: A

Explanation:

font-size is the correct CSS property used to define the size of text. It accepts values like px, em, rem, or percentages. It is widely supported across all browsers.

3.Which HTML element is used to define emphasized text?

- A.
- B.
- C. <i>
- D.

Answer: D

Explanation:

The tag is used for emphasizing text with semantic meaning. It usually displays in italic, but the key is its semantic value for screen readers and SEO.

4.Which CSS unit is relative to the parent element's font size?

- A. px
- B. %
- C. em
- D. rem

Answer: C

Explanation:

The em unit is relative to the font size of the parent element. It allows for scalable, responsive typography. It's commonly used for font sizing and spacing.

5.Which of the following are valid values for the CSS position property? (Choose two)

- A. static
- B. center
- C. absolute

D. baseline

Answer: A, C

Explanation:

The position property accepts values like static, relative, absolute, fixed, and sticky. center and baseline are not valid values for position.
